

**Deployment:**  
CAEP & NENA Conferences

**Date:** February 27-March 2, 2012

**MMU Role**

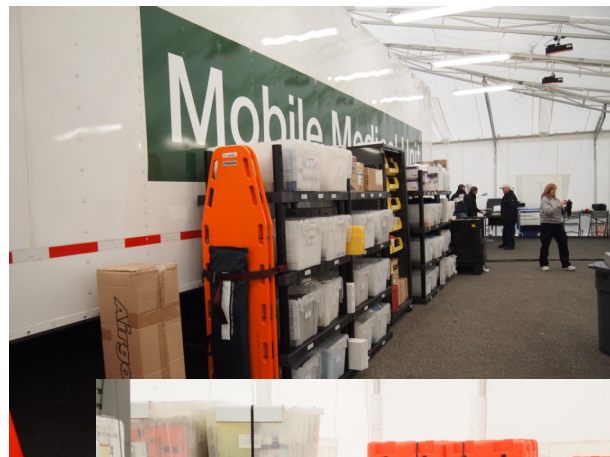

- Renovation Support
- Medical Education**
- Emergency/Disaster Response
- Event Support
- Outreach Clinics

**MMU Level of Capability**

- Level 1: Outpatient & first-aid
- Level 2: Minor ill & injured
- Level 3: Emergency resuscitation
- Level 4: 1-3 & emergency life-saving surgery**

**Deployment Highlights**

- First time the MMU tented structure (6000 sq ft) was set-up. This structure requires a specially trained crew for set-up and takes approximately 8-10 hrs. It can be used in sustained recovery missions where flexible space is required to provide shelter, triage, and minor care a large number of people;
- Partnership with the Public Health Agency of Canada (PHAC), whereby members from Ottawa provided education to BC health emergency managers on the set-up and configuration of the National Emergency Stockpile Mini-clinic supplies (inside the MMU tented structure); and
- Simulated disaster medicine education with clinicians from Richmond General Hospital.

**Clockwise from top left:** MMU tented structure partially set-up around the unit—from the photo you can see that the structure relies on the MMU trailer itself as a central support.; PHAC mini-clinic supplies set-up inside the tented structure; PHAC mini-clinic supplies palletized, prior to set-up; and triage stations (part of the PHAC mini-clinic) set-up inside the MMU tented structure.
